PART 1

1. THE PRODUCT

Use of the Product: This specification defines the requirements for gold and silver metal braid, cord, laces, badges and embroidery which are used by the Services

TABLE 3 – RELATED SPECIFICATIONS AND DOCUMENTS

Specification/Document	Detail
BS EN ISO 105	Textile. Tests for colour fastness.
Part B02	Colour Fastness to artificial light. Xenon arc fading lamp test
Part D01	Colour fastness to dry cleaning.
Part X12	Colour fastness to rubbing
BS 4973 Part 4	Specification for sew-in interlinings
UK/SC/4885	Cloth, Baratheia, Wool, Worsted
UK/SC/5516	Cloth, Melton, Wool for Dress Uniforms

2. PATTERNS

- a. Master Patterns. DC holds a Master Pattern for this product. Potential contractors may view the pattern on site by arrangement with the DC Commercial Department.
- b. Standard Patterns. A Standard Pattern may be obtained from the DC Technical Information Office and may be used to provide the criteria for all materials, components and manufacturing features not Fully defined in this specification.

PART 2

3. PRODUCT DESIGN

Product Description: Braid, cord, badges and laces in which part of the product component contains either gold or silver.

TABLE 4 – PRODUCT COMPONENTS

4.1 Textile Yarn	<ul style="list-style-type: none"> Textile yarns shall be dyed with sulphur-free fast dyes, to match the colour of the metal wire components; they shall meet the colour fastness requirements stated in Table 6, and shall be of adequate strength and durability.
4.2 Metal Wires	<ul style="list-style-type: none"> Metal yarns used shall be electroplated gold and silver as appropriate. Compositions are made up as follows with minimum proportions stated for gold and silver metal elements. <ol style="list-style-type: none"> Gold – 2% gold, 1% silver, 97% white metal * Silver – 50% silver, 50% white metal <p>* The white metal to be 95% copper, 5% nickel.</p>
4.3 Composite Yarns	<ul style="list-style-type: none"> Where combination metal and textile yarns are required e.g. as in Orris laces, the metal is to be twisted uniformly over the textile core, the number of turns used in covering the latter being such that complete coverage of the core is obtained, without “grinning” through of the textile base. The composite “metal” yarns used in all cases shall be uniform in diameter, and present a uniform and continuous gold or silver appearance.
4.4 Metal Embroidery Threads	<ul style="list-style-type: none"> Referring to all hand embroidered items included in Tables 7 to 12. All elements of metal, gold or silver embroidery must meet the minimum requirements in composition of gold and silver as stated in section 4.2. Metal Embroidery threads must be tarnish protected to ensure that subsequent handling during the hand embroidery process does not advance tarnishing of the end product. Acceptable protection can be either a light varnish finish or other approved chemical oxidation – prevention treatment, sufficient that it provides adequate protection without adversely affecting the finished appearance of the embroidery.

TABLE 4 – PRODUCT COMPONENTS CONTINUED

4.5 Ground Cloths for badges & chevrons	<ul style="list-style-type: none"> • For badges manufactured from melton ground cloth, the cloth is to be light Melton as specified in UK/SC/5516. • For badges manufactured from Barathea ground cloth, the cloth is to be as specified in UK/SC/4885. • Colour of ground cloth is to be as standard pattern.
4.6 Backing cloth	<ul style="list-style-type: none"> • <u>Dark coloured backing cloths.</u> Cloth, plain weave flax, black, Ref No. WS1 to BS 4973: Part 4, Pattern No. 8443A. NATO Stock No. 8305-99-942-7523 • <u>Medium to light coloured backing cloths.</u> Cloth, plain weave flax, to meet the physical requirements of BS 4973: Part 4 but to match shade of standard pattern. • Or an alternative approved by DC.

TABLE 5 – PRODUCT CONSTRUCTION

5.1 Braids and cords	<ul style="list-style-type: none"> • The braids and cords shall be produced by braiding composite metal threads around textile core yarns. Cord, gold, universal shall have a single core, and the Russia braids shall have two separate cores separated by the interlacing of the braiding threads. • Braiding shall be carried out to give an even braid, free from manufacturing defects. • The finished width of the braid or cord, number of spindles, braiding ends and plaits per cm shall comply with the requirements specified. *
5.2 Laces	<ul style="list-style-type: none"> • The weave order shall be as shown by the related Standard Patterns.* In this respect, only minor variations which do not affect the quality or the appearance of the lace will be permitted, i.e. the disposal, width, etc of the vellums, check, bar ends or ends within each type of lace must correspond with the relevant Standard Patterns. * • Selvages shall be firm and even, without kinks. The weft threads shall be evenly spaced and show no distortion across the width of the lace (especially within the vellums), so that objectionable “grinning” of the warp through the weft is not apparent.

TABLE 5 – PRODUCT CONSTRUCTION CONTINUED

5.3 Embroidery	<ul style="list-style-type: none"> Embroidery shall be carried out with approved textile yarns, and all sewing shall be securely finished off to match those properties of the related Standard Pattern.
<p>* The designs, widths and weights of the braids, cords, laces and embroidery shall be in accordance with the relevant Standard Pattern.</p>	
5.4 Manufacture	<ul style="list-style-type: none"> Braid, cord, laces and embroidery shall be manufactured to the highest standard and free from objectionable defects. Braid, cord and laces shall be even and width, construction and appearance shall be correct and uniform throughout each roll.
5.5 Appearance	<ul style="list-style-type: none"> Tarnished items are not acceptable.
5.6 Finish	<ul style="list-style-type: none"> Items are to be free from cracks.
5.7 Pliability	<ul style="list-style-type: none"> The completed braid, cord, lace and embroidery shall be of equivalent pliability to the relevant Standard Pattern.
5.8 Reels	<ul style="list-style-type: none"> Rolls may be cut to remove a defect provided that: <ul style="list-style-type: none"> No roll contains more than 1 cut. No length of less than 1 metre is included in a roll. A 0.25 metre allowance is made for a cut through.

4. PHYSICAL REQUIREMENTS

TABLE 6 – COLOUR FASTNESS REQUIREMENTS

The colour fastness requirements for the textile yarns employed for braids, laces, cords, or embroidery shall be not lower than the rating specified in the following Table:

Method of Test BS EN ISO 105		
B02 (Xenon lamp)	X12	D01
Light	Rubbing	Dry cleaning
6	Dry	Wet
	4 – 5	
		Colour change
		5

5. MARKING

Under no circumstances should the contractor's name, logo or trademark appear on the badge or on the packaging.

6. PACKAGING

- a. Each item is to be first wrapped in fully bleached, acid free lightweight unglazed tissue paper. It shall be free from foreign matter to prevent damage by rubbing, before being packed in suitably sealed clear polythene bags.
- b. The bag shall be identified with a clearly printed pressure sensitive self adhesive label firmly adhered to the outside of the package.
- c. Information and format on the label is to be as follows:
NATO Stock Number, Contract Number, Year of Manufacture and Denomination of Quantity (Figure 1).

FIGURE 1: EXAMPLE IDENTIFICATION AND MARKING LABEL
