

**Technical Specification for
BRAID, CORD, LACE, & BADGES,
Metallised Polyester, Gold & Silver**

Defence Clothing (DC)

PROPERTY OF
MINISTRY OF DEFENCE

PREFACETABLE 1 – PRODUCT LIST

Item Name	BRAID, CORD, LACE, & BADGES, Metallised Polyester, Gold & Silver
NATO Stock Numbers	See tables 8, 9 and 10

**Any colour shown in this document is for representation
and must not be used for colour matching.**

IPR STATEMENT

This specification contains information which is proprietary to the Secretary of State for Defence and shall remain the property of the Secretary of State. It is issued in strict confidence and must not be seen by any unauthorised person. The specification is supplied solely for the purpose of Information/Tender/Contract and shall not be copied or reproduced or used for any other purpose whatsoever without the express prior written permission of the Secretary of State as represented by the Intellectual property rights group.

**Technical documents in this specification refer to the edition current
at the date of tender or contract unless otherwise stated.**

PART 11. THE PRODUCT

- a. Use of the Product: This specification describes the requirements for materials and construction for metallised polyester gold and silver braids, cords and laces for use in uniform embellishments. The specification also contains details of badges in which the metallised polyester braid, cord and laces are used.

TABLE 3 – RELATED SPECIFICATIONS AND DOCUMENTS

2. PATTERNS

- a. Master Patterns: DC holds a Master Pattern for this product. Potential contractors may view the pattern on site by arrangement with the DC Commercial Department.
- b. Standard Patterns: A Standard Pattern may be obtained from the DC Technical Information Office and may be used to provide the criteria for all materials, components and manufacturing features not fully defined in this specification.

PART 23. PRODUCT DESIGNa. Product Description

Gold and silver braids, cords laces and badges made from metallised polyester.

TABLE 4 – PRODUCT COMPONENTS

4.1 Metallised polyester yarns	<ul style="list-style-type: none"> • The 'gold' or 'silver' thread is to consist of a metallised polyester film wrapped around a continuous filament core yarn. • The core yarns are to be dyed to an appropriate colour so that the effect of any grinning of the core yarn through the wrapping is minimal. • The wrapping material is to be a non-tarnishing metallised polyester film, which is to be wrapped around the core yarn to give a smooth metallic appearance. Yarn with any kinks, thick places or excessive core yarn grinning is unacceptable. • The shade of yarn is to match that of the standard pattern. • The complete yarn is to meet the colour fastness requirements specified in Table 5.
4.2 Ground cloth for badges & chevrons	<ul style="list-style-type: none"> • For badges manufactured from melton ground cloth, the cloth is to be light melton as specified in UK/SC/5516. • Felted wool cloth complying with the requirements in Tables 6 and 7 is an acceptable alternative to “Cloth, Melton, Wool” to UK/SC/5516 • Colour of ground cloth is to be as in Table 10 or to match Standard Pattern if not stated in specification.
4.3 Backing cloth for badges & chevrons	<ul style="list-style-type: none"> • <u>Dark coloured backing cloths.</u> Cloth, plain weave flax, black, to BS 4973: Part 4 WS1, Pattern No 8443A. • <u>Medium to light coloured backing cloths.</u> Cloth, plain weave flax, to BS 4973: Part 4 WS1, colour to match shade of standard pattern. • Or an alternative approved by DC.

TABLE 5 – PRODUCT CONSTRUCTION

5.1 Braids and Cords	<ul style="list-style-type: none"> • The braids and cords are to be produced by braiding, metallised polyester threads. The cords and Russia braids are to have textile core yarns. Russia braids are to have two separate cores separated by the interlacing of the braiding threads; cord gold universal is to have a single core yarn. • Braiding is to be carried out to give an even braid, free from manufacturing defects. • Russia braid patterns, 9513A, 9514A, 9515A and 9516A should be constructed such that when formed into small circles the braid should remain smooth and even and without core threads showing or breaking through the braided covering. • Tubular braids are to be braided without the inclusion of textile core yarns. • The construction of braids and cords in Table 8 is not specified due to the complex design and construction. The final appearance of the braid or cord being of prime importance and must match the appearance of the Standard Pattern. • The number of cover and core yarns in the construction as specified in Table 8 are for guidance only and are not mandatory.
5.2 Laces	<ul style="list-style-type: none"> • The weave order is to be as shown by the related Standard Patterns. In this respect, only minor variations which do not affect the quality or the appearance of the lace will be permitted, i.e. the disposal, width of the vellums, check, bar ends or ends within each type of lace must correspond with the relevant Standard Patterns. • The numbers of weft yarns in the construction as specified in Table 9 are for guidance only and are not mandatory. • The construction of laces in Table 9 is not specified due to the complex design and construction. The final appearance of the lace being of prime importance and must match the appearance of the Standard Pattern. • Selvages are to firm and even, without any kinks. The weft threads are to be evenly spaced and show no distortion across the width of the lace (especially within the vellums), so that objectionable “grinning” of the warp through the weft is not apparent.
5.3 Badges	<ul style="list-style-type: none"> • Insignia on the badges are to match the appearance of the standard pattern. • All dimensions are to be as standard patterns. • All backing cloths are to be as standard pattern.

TABLE 5 – PRODUCT CONSTRUCTION continued

5.4 General	<ul style="list-style-type: none"> • Braids, cords and laces are to be even width; construction and appearance are to be correct and uniform throughout each roll. • Items are to be free from all manufacturing defects. • All items to be as standard pattern. • The completed braid, cord and laces are to be no less pliable than the relevant Standard Pattern. • Reel lengths should not be normally less than 25 metres and the following shall apply: <ul style="list-style-type: none"> • No roll contains more than 1 cut. • No length of less than 3 metres is included in a roll. • A 0.25 metre allowance is made for a cut through. • Other reel lengths should be proportioned accordingly.
5.5 Measurements / Parameters	<ul style="list-style-type: none"> • The braids, cords and laces are to conform to the appropriate measurements shown in Tables 8 and 9.

4. PHYSICAL REQUIREMENTSTABLE 5 – COLOUR FASTNESS REQUIREMENTS

The colour fastness requirements for all components of the synthetic gold yarns are not to be lower than the ratings specified in the following table:

Method of Test BS EN ISO 105			
BO2 (Xenon lamp)	X12		DO1
Light	Rubbing		Dry cleaning
6	Dry	Wet	Colour Change
	4-5	4-5	5

**TABLE 6 – PHYSICAL REQUIREMENTS FOR ALTERNATIVE
FELTED WOOL BADGE BACKING**

BS EN 1773	BS EN 12127	BS EN ISO 13934-1		BS EN ISO 13937-3		BS 4323	
Usable Width	Mass	Breaking Strength		Tear Strength (electronic method)		Dimensional Stability to Free Steam	
cm	g/m ²	N		N		%	
min	min	min		min		max	
		Warp	Weft	Across Warp	Across Weft	Warp	Weft
150	500	320	300	22.0	21.0	±3	

- Minimum 85% wool, balance other fibres, 9.8% Nylon and 1.7% polyester has been found to be acceptable.

**TABLE 7 – MINIMUM COLOUR FASTNESS REQUIREMENTS FOR ALTERNATIVE
FELTED WOOL BADGE BACKING**

The colour fastness is to be no lower than specified by the ratings in the following table.

METHOD OF TEST							
BS EN ISO 105							
B02	E04		X12	D01		E01	
Light	Perspiration Acid & Alkali		Rubbing Dry & Wet	Dry Cleaning		Water	
Rating	Change	Staining Cotton & wool	Stain	Change	Staining Solvent	Change	Staining Cotton & wool
4-5	4-5	3-4	4-5	4-5	4-5	4-5	4-5

5. PACKAGING & LABELLING

- Packaging and package labelling shall be as detailed in the contract conditions.
- Each reel of braid, cord or lace is to have a pressure sensitive self adhesive label firmly adhered and then sealed in a polythene bag.
- Badges are to be sealed (pairs or each) in a clear polythene bag.
- Under no circumstances should the contractor's name, logo or trademark appear on the badge or on the packaging
